■ **1Q23 results in line.** NII was stable YoY as higher interest income (+70% YoY) was offset by higher interest expenses, which went from Eu 2.9mn (1Q22) to Eu 19.4mn (1Q23). All business lines/products contributed to the increase in interest income, albeit with income-backed loans to a lesser extent as the loan book is fixed rate. The overall contribution to P&L from LPI under legal action came to Eu 11.1mn (Eu 4.1mn in 1Q22) thanks also to the ECB policy rate increase, which took the overall LPI rate to 10.5% (from 8%) and which is expected to be further increased by July 2023 (updated twice a year according to the ECB rate). Factoring turnover grew by 9% YoY, the income-backed loan book was slightly down YoY, while pawn loans grew by +19% YoY. The financial portfolio was pretty stable YoY, cost of funding grew to 2% in 1Q23 (from 0.4% in 4Q22), and retail deposits went down QoQ (Eu 1906mn vs Eu 2071mn) as the bank decided to reduce the component linked to corporate clients, which is more expensive. The fully-loaded CET1 ratio stood at 12% in the quarter and includes 1Q23 net profit of Eu 3.7mn (vs Eu 4.4mn registered in 1Q22).

■ **Feedback from the conference call.** Management sees a further increase in cost of funding in the coming quarters albeit at a slower pace, which should take the total cost of funding from the current 2% to 2.5% by YE. Management will focus on retail deposits vs corporate deposits, as the former are less expensive; residual maturity of retail deposits equates to 12M. The contribution of income-backed loans will remain subdued for a few quarters while higher LPI should support NII. Any change in split payment rules should be neutral for the bank; the process for the IPO of subsidiary Kruso Kapital is ongoing and no capital gain is expected as the IPO will involve a capital increase.

■ **No change in estimates.** We are keeping our estimates unchanged as we want to see the impact of higher rates on both assets and liabilities. Cost of risk seems to be under control and even lower than our expectations.

■ **Outperform confirmed, T.P. 1.75.** We think earnings downgrades due to higher cost of funding should be over and new production should sustain the top line in the coming quarters. Asset quality remains solid and capital is sufficient to finance future growth. Stock trading at 0.5x TE with ROE at 10% and a dividend yield at 5% on average.

IMPORTANT DISCLOSURES

The reproduction of the information, recommendations and research produced by Intermonte SIM contained herein and of any its parts is strictly prohibited. None of the contents of this document may be shared with third parties without authorisation from Intermonte.

This report is directed exclusively at market professional and other institutional investors (Institutions) and is not for distribution to person other than "Institution" ("Non-Institution"), who should not rely on this material. Moreover, any investment or service to which this report may relate will not be made available to Non-Institution.

The information and data in this report have been obtained from sources which we believe to be reliable, although the accuracy of these cannot be guaranteed by Intermonte. In the event that there be any doubt as to their reliability, this will be clearly indicated. The main purpose of the report is to offer up-to-date and accurate information in accordance with regulations in force covering "recommendations" and is not intended nor should it be construed as a solicitation to buy or sell securities.

This disclaimer is constantly updated on Intermonte's website www.intermonte.it under LEGAL INFORMATION. Valuations and recommendations can be found in the text of the most recent research and/or reports on the companies in question. For a list of all recommendations made by Intermonte on any financial instrument or issuer in the last twelve months consult the [PERFORMANCE](#) web page.

Intermonte distributes research and engages in other approved activities with respect to Major U.S. Institutional Investors ("Majors") and other Qualified Institutional Buyers ("QIBs"), in the United States, via Brasil Plural Securities LLC under SEC 15a-6 guidelines. Intermonte is not registered as a broker dealer in the United States under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and is not a member of the Securities Investor Protection Corporation ("SIPC"). Brasil Plural Securities LLC is registered as a broker-dealer under the Exchange Act and is a member of SIPC.

ANALYST CERTIFICATION

For each company mentioned in this report the respective research analyst hereby certifies that all of the views expressed in this research report accurately reflect the analyst's personal views about any or all of the subject issuer (s) or securities. The analyst (s) also certifies that no part of their compensation was, is or will be directly or indirectly related to the specific recommendation or view in this report.

The analyst (s) responsible for preparing this research report receive(s) compensation that is based upon various factors, including Intermonte's total profits, a portion of which is generated by Intermonte's corporate finance activities, although this is minimal in comparison to that generated by brokerage activities.

Intermonte's internal procedures and codes of conduct are aimed to ensure the impartiality of its financial analysts. The exchange of information between the Corporate Finance sector and the Research Department is prohibited, as is the exchange of information between the latter and the proprietary equity desk in order to prevent conflicts of interest when recommendations are made.

The analyst responsible for the report is not a) a resident of US; b) an associated person of a U.S. broker-dealer; c) supervised by a supervisory principal of a U.S. broker-dealer. This Research Report is distributed in the U.S. through Brasil Plural Securities LLC, 545 Madison Avenue, New York 10022.

GUIDE TO FUNDAMENTAL RESEARCH

The main methods used to evaluate financial instruments and set a target price for 12 months after the investment recommendation are as follows:

- Discounted cash flow (DCF) model or similar methods such as a dividend discount model (DDM)
- Comparison with market peers, using the most appropriate methods for the individual company analysed: among the main ratios used for industrial sectors are price/ earnings (P/E), EV/EBITDA, EV/EBIT, price /sales.
- Return on capital and multiples of adjusted net book value are the main methods used for banking sector stocks, while for insurance sector stocks return on allocated capital and multiples on net book value and embedded portfolio value are used
- For the utilities sector comparisons are made between expected returns and the return on the regulatory asset base (RAB)

Some of the parameters used in evaluations, such as the risk-free rate and risk premium, are the same for all companies covered, and are updated to reflect market conditions. Currently a risk-free rate of 4.0% and a risk premium of 5.5% are being used.

Frequency of research: quarterly.

Reports on all companies listed on the S&P500 Index, most of those on the MIBEX Index and the main small caps (regular coverage) are published at least once per quarter to comment on results and important newsflow.

A draft copy of each report may be sent to the subject company for its information (without target price and/or recommendations), but unless expressly stated in the text of the report, no changes are made before it is published.

Explanation of our ratings system:

BUY: stock expected to outperform the market by over 25% over a 12 month period;

OUTPERFORM: stock expected to outperform the market by between 10% and 25% over a 12 month period;
